

POLISH FOOD TECHNOLOGISTS' SOCIETY

in cooperation with

Department of Meat Technology of Poznań University of Life Sciences
and other Polish scientific institutions

Poznań University of Life Sciences

is pleased to announce

the Vth International Scientific Conference
“MEAT IN TECHNOLOGY AND HUMAN NUTRITION”
under its working title
“MEAT AS A FUNCTIONAL AND PRO-HEALTHY PART OF OUR DIET”.

The conference will be held in Poznań from June 27th to 29th, 2018.

Scope of the conference

There are numerous proofs corroborating the fact that meat constitutes an important constituent of the human diet, although there are also scientific beliefs presenting completely contradictory opinions. Arguments presented by one group of scholars are frequently challenged by the other group. Scientific advances and innovative technologies indicate that meat utilisation in its natural form as well as in the form of a functional and pro-healthy component in our diet is expedient and advantageous and can even be increased. Conference presentations dealing with issues associated with meat quality improvement, problems of nutrigenomics, obtaining bio-constituents from meat, innovative processing technologies and authenticity of food products, supported by discussions of scientific authorities in these fields of science, should provide new information for both science and practice. Therefore, we invite all scientists and specialists from all over the world to attend our conference.

Main conference's sessions

1. Changing conditions of meat production
2. Meat – its functional properties and the source of bioactive compounds
3. Innovation in meat science and processing
4. Developments in evaluation of meat quality, safety and authenticity

Conference organization

The organizers envisage presentations of plenary papers, short presentations, posters (including e-posters). Submitting contributions in the form of short presentations, posters or e-posters, please, indicate which session they should be assigned to. The Organizing Committee reserves the right to verify the submitted papers. The conference participation fee is 850.00 PLN (800.00 PLN PFTS members) and covers: costs of organization, board, printing of conference materials (summaries) and the Conference Banquette. The fee does not include travel costs and accommodation. The conference is of international character and all materials have to be prepared in English. English will also be the language of the conference. It is possible to print full text (after review) in scientific journals [Polish Journal of Food and Nutrition Science (IF=1.276), Food Science Technology Quality] or in the conference monography.

Major dates:

1. Submission of participation applications and titles of the presentation – by 15.01.2018
2. Summaries (in English) are to be sent in and conference fee transferred by 15.03.2018.

You are kindly requested to submit your participation applications via our Internet site:

www.up.poznan.pl/meat2018/

There, you can also find all additional information connected with the conference, including information regarding possibilities of hotel reservations. Possible other matters can be consulted directly at the Conference Secretariat: Department of Meat Technology, University of Life Sciences in Poznań, 60-624 Poznań, ul. Wojska Polskiego 31, tel. 061 8487254 or via e-mail: meat2018@up.poznan.pl

Conference Secretary
PhD. Ing. Mirosława Krzywdzińska-Bartkowiak

Chairman of the Organising Committee
PhD. Sc.D. Hanna M. Baranowska
